MINING, BUSINESS AND STOCKS

FIGURES ON METAL OUTPUT.

The Production of Mines in the United States Last Year Was About \$500,000,000.

MANY INCREASES ARE SHOWN.

Particularly Interesting is the Story Of Copper-Lead, Iron and Silver in Abundance.

In its issue of the 7th inst., the Engineering and Mining Journal presents some interesting statistics bearing on the metal products of this country, upon which it places an estimated valuation of \$509,037,145. While it is admitted that these figures cannot be exactly accurate, yet it is not expected the official figures of the government to be released next June will show no radical change

in the totals. The production of alluminum in the United States during 1903 was about 7,-500,000 pounds, valued at \$2,325,000, as compared with 7,200,000 pounds, valued at \$2,284,590 in 1901.

The copper production is given at 670,-\$80,000 pounds, valued at \$88,334,770, as compared to 610,815,384 pounds, valued at \$71,072,586, during the previous 12 months. The quality of metallic cop other than manufactures, imported dur-ing the first 11 months of last year, were 126,615,475 pounds, valued at \$15,996,502, against 86,857,978, valued at \$11,126,239, in the corresponding period of 1902. The exports were 272,000,604 pounds, valued at \$36,200,667, in the 11 months of 1903. and 336,023,154 pounds, valued at \$41,179,-

In estimating the output of gold, the figures furnished by the director of the mint were used, being 3,600,645 ounces, valued at \$74,425,340, as compared with 3,870,000 ounces, valued at \$79,992,800 1902. The imports of gold for the 11 months ending Nov. 30, amounted to \$48,037,398, while the exports during the same period were \$42,882,178.

The production of pig iron showed a small increase in 1903, thus establishing a new record for the industry in the United States. The total output was 17,942,840 long tons, against 17,821,307 tons in 1902, a gain of about 0.7 per cent. There was a large decline in the average market prices of the different grades of pig iron, and the total value of the product was approximately \$265,-554,032, against \$303,156,995 in 1902. The imports of pig iron into the United States in 1903 were 602,855 long tons, and the exports for the same year were 17,-111 tons against 625,383 tons and 27,487

tons, respectively, in 1902. The total output of desilverized, soft and antimonial lead produced in 1993 was 289,030 short tons, valued at \$24,492,. 402, as compared with 289,030 short tons, valued at \$24,492,402, as compared with 280,524 tons, valued at \$22,829,043 in the previous year, showing an increase of about 3 per cent. In addition, there was a production in 1903 of 84,771 tons of ad from foreign ores and bullion. The imports of lead in ores and all forms other than manufactures during the first 11 months of 1903 amounted to 196,-936,017 pounds, valued at \$3,510,043, segainst 193,828,431 pounds, valued at \$4,-141,032, in 1902. The exports were 111,-269 pounds, valued at \$6,156 in 1903, and 6,477,380 pounds, valued at \$283,248, in

The production of quicksilver in 1903 was 29,103 flasks, valued at \$1,295,083, against 34,451 flasks, valued at \$1,500,142, in the previous year. The exports during the first 11 months of last year were 1,280,298 pounds, valued at \$682,700, as compared with 942,980 pounds, valued at

\$535,702, in the same period of 1902.

The total output of silver from domestic ores in 1903 was 56,519,793 troy ounces, valued at \$30,520,688, against 55,-500,000 ounces, valued at \$29,415,000, 1902, showing an increase of 1,019,793 ounces, or about 1.8 per cent. No statistics of the quantity of silver recov-ered from foreign ores and bullion in 1903 are available at this time, but the total for 1902 was 48,087,244 ounces. The imports of silver during the 11 months of last year, ending Nov. 30, was valued at \$21,895,853, as compared with \$23,701. 649 in the same period of 1902. The ex-ports were \$34,119,689 in the 11 months of 1903, and \$43,726,079 in the 11 months of the previous year.

The production of zinc in 1903 showed a slight falling off, the total being 156, 218 short tons, against 158,237 tons in 1902, a decline of 1.2 per cent. This small decrease was more than coupterbalanced by the rise in prices, so that the total value of the product in 1963 was \$16,882,344, as compared with \$15,-317,342 in 1902. During the first 11 months of 1903 the imports of zinc and manufactures of zinc were valued a \$48,761, as compared with \$71,745 in 1902; while the exports for 1903 were \$205,290 against \$402,345 for 1902.

AMONG THE BROKERS.

tagnation Was Appalling During Forenoon Calls on 'Change.

The mining stock market this fore noon was about as dead as it could be. During the regular call the volume of business transacted amounted to just \$614.62, the equivalent of 4,300 shares transferred, while the open board pre-sented the spectacle of a \$9 session, the sum paid for 200 shares of Victor Con-

The first stock which recorded a sale during the forenoon was Consolidated Mercur, which held even with the quotations of yesterday. A single lot of Sacramento found a taker at 20% cents, while the price of Century held only a small bunch transferring. The closing quotations and sales post-

READY TO SHIP ORE.

Ohio Management Prepared to Send Out 200 Tons Daily.

Major H. G. Caitrow of the Ohio Coper company came in from that Bing. ham mine last night, very well satis-fied with the condition of things there, only that he is anxious to get ore mov-

ing towards market.
"The Copper Belt wreck," said the major this morning, "has tied us up for a few days, otherwise we would be shipping. The bins are all filled at the shipping. The bins are all filled at the mine and with the exception of laying a short piece of track in lower Bingham, the Winnemuck mill will be nected up with the Copper Belt line. We are ready to ship 200 tons of ore daily, 150 tons of second class to the mill and 50 tons of first class direct to

the smelters."

The mill will not go into commission before some time next week, as it will probably take several days yet to get the Copper Belt line in operation again.

UNCLE SAM MILL.

Demonstration Being Made There Shows Satisfactory Results.

Word received from Tintic during the day conveyed the information that Foreman J. S. Jensen is turning out a nice grade of concentrates at the new mill at the Uncle Sam mine. The plant is doing splendid work, it is said, the basis of concentration being about six into one.

The concentrates produced show about 50 per cent lead, 20 ounces silver and .15 ounce gold. Contracting Engineer J. M. Callow is working on a device to enable a great saving in the water used, which is already low, being at the rate of 15 gal-

NOT SO BAD AFTER ALL. Salt Lake Stock Exchange Led in Vol

ume of Business Done Last Year. Notwithstanding that the business of the Salt Lake Stock & Mining Exchange was about 50 per cent lower in 1903 than that in 1902, it outdid all the other established exchanges of country last year, that is, so far as mining stocks are concerned. After commenting to some length on the subject an eastern publication continues by saying: "At Colorado Springs there has been a very quiet market with narrow fluctuations there has been as the continues of the tuations, though in some specialties erratic quotations were witnessed. In New York the usual conditions prevailed, except last March, when a genuine Comstock boom was gotten under way and prices advanced from 500 to 600 per cent. The market simply foilowed the lead set by the San Francis-co exchange. Natural levels were soon

Tragedy Averted. "Just in the nick of time out little boy was saved," writes Mrs. W. Wat-kins of Pleasant City, Ohio, "Pneu-monia had played sad havoc with him and a terrible cough set in besides. Doctors treated him, but he grew worse every day. At length we tried Dr. King's New Discovery for Consumption, and our darling was saved. He's now sound and well." Everybody ought to know, it's the only sure cure for Coughs, Colds and all Lung diseases. Guaranteed by Z. C. M. I. Drug Store. Price 50c and \$1.00. Trial bottles free.

MISFORTUNES OF THE CAMP OF ELY.

Stock Jobbers Reaped a Harvest And, as a Result, Progress Is Now Retarded.

INVESTIGATE. SHAREHOLDERS

And Are Demanding an Accounting-Chainman Finances Are About to Be Fixed Up Again.

Forenoon's totals.. 4,500 \$623.62 Ely. Nev., is an unfortunate camp and is a good demonstration of what mismanagement, coupled with appalling stock jobbing will do, for a mining district that is truly meritorious. Eminent mining engineers, who have examined this region, have proclaimed that its possibilities are indeed great; but unfortunately, all the money derived from the floating of stocks throughout the east has not been spent legitimately in all cases and Ely has

suffered by it. Two years ago the citizens of the camp were encouraged in the belief that several strong companies had entered the camp with the intention of conducting their operations as they should be. On the contrary, the very ones in which the people of the camp placed the greatest confidence turned out to be the worst stock manipulators that ever landed in Nevada. Stocks were sold at enormous

prices and the proceeds usually went into the pockets of the promoters. Late advices from Ely are to the effect that the victims of these sharks are demanded an accounting from som of the late managers and a determined effort is being made to place the re-sponsibility for the outrages that have been committed.

The shareholders in the Chainman mine, it is said, have hopes of straight-ening out affairs in such shape that a resumption of operations is not unlikely within a few months.

Only a few days ago R. J. Davidson, one of the heaviest of the eastern stockholders in the company was in

the city and held several sessions with some of the creditors of the company and when he left expressed the opinion that the company's finances would soon be straightened out and the mines started up again, this time, un-der experienced and competent management. The Chainman is one of the best equipped mines in Nevada, although a very large portion of it is absolutely of no use to the company. For instance, a large combination mill was built at an expense of several hundred thousands of dollars without going to thousands of deliars without going to the care of ascertaining whether the process installed was suitable to the ores of the mine. In fact, at the time the plant was built, the mine contain-ed very little ore at all. Fred Butler, formerly connected with the Mercur mines, was called in as superintendent mines, was called in as superintendent and during his administration consider able ore was developed, but until then the workings showed up little ore of

on leaving the city, Mr. Davidson proceeded to Sumpter, Or., where he has mining interests. Upon his return east he will confer further with Chainman stockholders.

MINES OF DUGWAY.

Fine Showings Made at Two of the Camp's Important Properties.

L. Cutler, superintendent of the St. George Copper company's claims at Dugway, is in the city. He says the camp was never in a more properous condition and cities as an indication thereof the fact that many of the claims are showing high grade copper ore, which also carries good values in gold and silver. The St. George property is owned by W. F. Snyder, Clarence Mc-Cornick, Mr. Cutler, E. J. Raddatz and others and the miners are now drifting from the 100-foot level and have one from the 100-foot level and have en-countered an immense body of lead or 200 feet from the chute, some of which is now being taken out for shipment. The group also shows surface ore running as high as 45 per cent copper, \$60 in gold and from 12 to 15 ounces in sil-

Mr. Cutler is also overseeing work on the claims of the Dugway Mining com-pany, of which Hon. Angus M. Cannon is president. The Dugway has 291-3 patented claims and is now working a small force of men on the Black Maria, on which the shaft has been sunk to a depth of 50 feet, with a crosscut of The ledge was cut at a depth of feet and the miners sacked five tons of ore, showing values running well in copper, gold, silver and lead. The highest assays go 28½ per cent copper, \$41.34 gold, and 70 per cent lead. The ore occurs in the different stratifications in quartzite and gives every indication of being permanent. The miners are now crosscutting for the contact, which, it

is believed, will present a showing similar to that in the St. George group.

In the Endline claim on the same property there is a vein 28 feet wide at a depth of 60 feet, where a Buffalos whim has been installed. The Rattler group of 14 claims shows a body of lead ore two feet thick in the vein and can be traced for 2,000 feet. From this property the company has never shipped a car going less than 55 per cent lead. The Dugway company is incorporated for 60,600 shares at \$1 per share, and has 16,000 shares in the treasury. If a has 16,000 shares in the treasury. If a railroad were built into the camp this property would be a regular shipper. Mr. Cutler will return to camp the end

UTAH CONSOLIDATED.

Anticipated That Mine Will Produce 24, 000,000 Pounds of Copper This Year.

The Utah Consolidated produced 14,000,000 pounds of copper during last year which showed profits of between \$1,200,000 and \$1,300,000, equal to slightly over \$4 per share, says an authority. This showing was made in the treat-ment of ore averaging about 4 per cent copper for the year, of which there is a great abundance in the property. The management is figuring upon a pros-pective output of 24,000,000 pounds of copper per annum, when the enlarged

smelter is completed. It is not anticipated that the com pany will make any change in its divi-dend rate six months hence, although it is possible, but before the close of 1904 Utah Consolidated may be placed

upon a \$4 basis. The present smelter was built originfor the treatment of 250 tons per day and it cost \$329,906. When the exbecame apparent, however, an addi-tional expenditure of \$425,000 was made, increasing the capacity for the treat-ment of 500 tons and at the same time preparations were made for a still further enlargement by providing power for the treatment of 500 tons daily.

The enlargement now being made, it is claimed will not cost more than \$250,000.

MORE DIVIDENDS COMING. Physical Conditions Good at the Rocco Homestake Mine.

A letter from Bert L. Smith, secretary of the Rocco-Homestake mine in Nevada, conveys good news concerning conditions at that property, which has again come forward with a dividend. During the past year, it is said, ore of the estimated value of \$100,000 has been blocked out, hence this year begins with everything to indicate that there will be several distributions of "velvet" during the next twelve

In themeantime work is progressing satisfactorily in the new shaft, started sometime ago, over which a new steam hoist has been installed. Considerable Rocco-Homestake stock is held in Salt Lake, but the bulk of it is in the hands of San Francisco peo-

Completed the Contract.

Reports from the Park City Gold and Silver mine are encouraging. Orson and Owen Spiers have just completed a contract by which they established a drift of 85 feet, beginning at a depth of 365 feet. Excellent prospects were dis-covered and the contract will be re-newed immediately.

AS A RULE MARKET

New York, Jan. 14.-Opening prices in the stock market today advanced on very small dealings in response to the more cheerful sentiment in foreign markets over the far eastern outlook. Traders took profits immediately on the overnight advances and the important stocks reacted slightly. The downward movement was accelerated by pressure against Rock Island and liquidation in United States Realty preferred. Buying of Southern Pacific, which carried it above 49, subsequently stiffened the entire market, and some of the western stocks added to their earlier gains. Realty preferred dropped 2% and showed little resistance to pressure. A rise of 1% 01% in Pennsylvania led a fairly general advance in which St. Paul, Union Pacific, Wabash preferred. Delaware & Hudson, United States Steel preferred, Sloss-Sheffield Steel, the New York public utilities and a few minor stocks rose 1%@1%. Rock Island rallied a point, Intense duliness developed on the

Bonds were irregular at noon. In the early afternoon the standard stocks were motionless and but little heed was given to the strength shown by a sprinkling of the low priced stocks. Kansas City Southern preferred advanced
